Projects

CampusConnect : Source code

- **Technologies used :** Reactjs, SpringBoot,MySQL, Postman ,CSS, Chakra UI.
- Developed a responsive web application enabling users to access and explore university events and club details effortlessly. Users can seamlessly register for events, view event specifics, and filter events based on date ranges.

NotesSharing App : Source code

- **Technologies used :** Reactjs, SpringBoot, JWT, MySQL, Postman ,CSS, Reactstrap.
- Developed a web application for note-sharing, utilizing Jwt authentication. Users can create, view, and interact with posts containing personal notes. Implemented strict access controls, allowing users to modify only their own posts while still engaging with others content.The application is responsive, ensuring seamless access across various devices.

Whack-a-Mole(Mario Version) : Source code

- **Technologies used :** HTML, CSS, JavaScript
- Developed a interactive browser-based game inspired by the classic arcade game "Whack-a-Mole" with Mario-themed adaptation.

Portfolio : Source code

- **Technologies used :** React, CSS.
- Developed a personal portfolio website to showcase professional work, skills, projects, and hobbies.
